## ACHIEVE YOUR BUSINESS GOALS at JAPAN AEROSPACE 2016

Japan Aerospace 2016, October 12-15, is an ideal platform to meet top players in the aerospace and defense industry. Held in the heart of Tokyo, Japan Aerospace is the number one opportunity to meet with executives and government policy makers, as well as access the **latest technologies**. Japan Aerospace offers an affective stage to **access recent trends and innovations** in the industry. This exhibition facilitates communication between companies in the broader aerospace market.

### Top Reasons to Exhibit at Japan Aerospace 2016:

- **636** exhibitors from **32** countries
- **3,500** pre-matched meetings
- **22,000** trade show visitors
- World-class international trade show

Japan offers a lucrative market for imported aircraft, aircraft parts, and engines. U.S. firms have an overwhelming presence in the market due to long-standing relationships, some spanning over 50 years, with domestic manufacturers and trading firms. U.S. firms are presented with opportunities in the market as the domestic industry undertakes international projects, develops transport and patrol aircraft for defense, and develops small jets and small jet engines for civil aviation. U.S. firms that are new to the market should consider partnering with trading firms that are knowledgeable in aircraft industry networks.

### Japan Aerospace Market

Value in \$US Millions

	2012	2013	2014	2015
Market Size	15,021	15,717	16,503	17,328
Local Production	12,829	13,576	14,255	14,968
Exports	10,048	9,980	10,479	11,003
Imports	12,240	12,121	12,727	13,363
U.S. Imports	8,832	8,350	8,768	9,206
