

Michelangelo Fani

Head of Engineering and Production Support

Michelangelo Fani is a manager of the Group Purchasing department in Finmeccanica Group Services and he is currently assigned as the Head of Engineering and Production Support, focusing especially on Engineering and Design, Test Equipment, Production Auxiliaries and Raw materials.

He is in charge of defining Commodity Strategic Plans to increase competitiveness leveraging on external cost reduction and manage comprehensive negotiation processes, defining technical selection criteria and methodology. Moreover he is responsible for worldwide sourcing activities of commodities and products directly related to the manufacturing value chain. He also actively defines guidelines and coordinate Technical Boards with internal stakeholders to develop efficiency oriented policies.

Prior to Procurement and Sourcing experience, he worked at the University “La Sapienza” in Rome following his master’s degree in Electronic Engineering with Radar and Remote Sensing specialization.

Mr. Fani earned his M.S. with honors in Electronic Engineering at University “La Sapienza” in Rome. The thesis has been presented at the International Conference “Exploring Mars Surface and its Earth Analogues” organized by ASI (Italian Space Agency) in 2002.

He speaks Italian, English and Spanish and he is licensed to practice as professional Engineer in Italy.
