Trade Fair Certification Connecting U.S. Suppliers to Global Markets

PAACE
automechanika
MEXICO CITY

July 11-13, Centro Citibanamex, Mexico City

PAACE Automechanika Mexico City is considered to be the most important international trade show for the automotive aftermarket industry in Latin America. With more than **500 exhibitors** from across the globe and over **26,000 key decision makers**, it is THE meeting point for industry professionals seeking new suppliers, information about the latest technology and analyzing product options.

Who Should Attend

Wholesalers
Distributors
Owners
Retailers
Manufacturers
Electronics & Systems

Product Groups

Parts & Components
Accessories & Tuning
Repair & Maintenance
IT & Management
Service Station & Car Wash

Mexico remains the seventh largest vehicle producer in the world, with 3.9 million cars. It is also the fifth largest auto part producer worldwide with 75 billion dollars. Recent investments by established automakers and new OEMs have increased business opportunities throughout the country. It has also attracted its tier one- and second supplier base. The forecast is to reach five million vehicles produced by 2020 with new players in the field and an expansion of car manufacturing.

Carmakers and its tier supplier base is looking for manufacturing 4.0 technologies, telematics, big data systems, smart packaging, automation systems and anything that can reduce times, processes or assist with information management and cybersecurity.

In the aftermarket, the industry focuses on after dealer service checks with parts that help the consumer replace from brakes, suspension parts, electric parts, engine parts and extend the vehicle's life.
