Join the U.S.-China Environmental Technology & Pollution Control Forum to capitalize on emerging opportunities in China’s environmental protection markets!

China’s rapid development has brought with it concerns about environmental pollution. As a result, there is booming demand for technologies to mitigate these environmental hazards. By 2020, China’s government expects USD310 billion of investment into the water treatment sector. Furthermore, the government projects that the VOC market will grow to USD22 billion and will spur a 10% reduction in VOC emissions. Chinese provincial governments view environmental technology as a top priority, making it one of the largest areas for investment and growth. Northeast China presents untapped and growing opportunities for U.S. environmental technology exporters. Policies enacted to revitalize the Northeast China region have included tougher environmental controls and enforcement standards. The government projects that total investment in Heilongjiang Province in ground water remediation alone will be USD150 million, and USD16 million is budgeted to resuscitate contaminated farmland.

This forum aims to provide a platform for American businesses exploring opportunities to enter the market. Officials from the Heilongjiang Provincial Government and Harbin Municipal Government will convene local Chinese companies to participate in the event. A number of industrial park administrative committees will facilitate decision makers from local Chinese companies to participate in this forum and the following matchmaking meetings.

AGENDA

- May 23, 2019  Afternoon  U.S. companies Assemble
- May 24, 2019  09:00-09:30  Opening Remarks
- 09:30-09:50  Keynote Speech
- 10:00-15:00  Breakout Sessions
  - Breakout Session A
    - Industrial Park Pollution Control Forum
  - Breakout Session B
    - Water Treatment Forum
- 15:20-16:20  One-on-One matchmaking meetings

OPPORTUNITIES

- 15 minute presentation
- 1 delegate to participate in a closed door meeting with local government officials
- Access for 2 delegates to the rest of the event
- Company logo insert in promotional materials
- Display promotional materials during the forum
- Company name mention during the opening remarks
